

KEY INFORMATION FOR GRAVE OWNERS

- Permitted memorial options for the type of grave selected

Lawn graves permit a headstone with base - traditional memorials permit a full kerb memorial that covers the 6'6" x 2'6" grave space.

- Care of the grave immediately after the burial

It is normal for the grave to settle soon after the burial, more so in wet conditions. The grave will be topped up by the cemetery as soon as possible using heavy soil.

- Future care of the grave

No fencing around lawn graves is permitted. Trees are not to be planted within or around the grave. When the grave has settled, normally after 9-12 months the cemetery will topsoil and seed the plot.

Full information about care of graves is provided in the Cemetery Rules and Regulations.

- Floral tributes & personal items

The cemetery will remove floral tributes normally after 14 days or sooner if their condition detracts from the general appearance. The cemetery cannot take responsibility for the safe keeping of any items left on the grave space.

- Grave Exclusive Rights of Burial - lease period

The length of lease granted for cemetery grave plots at West Lancashire is 50 years. This can be topped up after 25 years or renewed when expired.

- Rules and Regulations

A complete copy of the Cemetery Rules and Regulations has been provided.

- Grave positioning

The orientation of the selected grave and surrounding positions has been identified and confirmed. The cemetery reserve the right to add additional positions or change the layout/numbering of a section should the need be required.

I agree with the details listed on the front of this form and accept the above information has been explained to me.
